Abstract (en)

A capping head (34) in which a plurality of cap chuck units (36) for performing various packing processings to a container (8) are linearly arranged along the container conveying direction of a conveyor (6) is provided for a follow-up device (18) of a capper (2). A system includes a capper capacity changing unit (61) which can change the capacity of the capper (2) by changing the number of cap chuck units (36), and moving stroke changing means (62) which changes moving stroke of the follow-up device (18) in accordance with the cap chuck units (36). <IMAGE>
