Abstract (en)

[origin: EP1298629A2] The method involves dividing a display into fields and displaying a letter, number or character in each field. A field in the display has 8 by 16 pixels and e.g. 96 fields of this size are stored in a computer with letters, numbers and characters. The 110 letters of the Arabic alphabet are represented by e.g. 82 letters, so that numbers 0 to 9 and some characters can be displayed.
