Abstract (en)

[origin: WO0204228A1] In addition to a set of dividers having staggered tabs and binder holes, the retail packaging includes a sheet protector pocket (304) having a front (308) sheet and a back (312) sheet and binder holes (320). The user removes the dividers and pocket (304) from the packaging and custom designs and prints sheet indicia on a paper sheet (350). He then inserts the printed sheet into the pocket whereby the front sheet allows the sheet indicia (368) to be viewed therethrough. The front sheet has pre-printed indicia thereon. With the printed sheet in the pocket and the pocket and dividers assembled in a ringed notebook or other binding system, the sheet indicia and the pre-printed indicia line up with respective ones of the tabs. The indicia thereby form an attractive custom-designed table of contents, which can be easily corrected or changed by the user by simply printing and inserting into the pocket a new sheet.
