Abstract (en)  
[origin: WO0202597A2] Glycosylated polypeptides comprising the primary structure NH<sub>2</sub>-X-Pp-COOH wherein X is a peptide addition comprising or contributing to a glycosylation site, and Pp is a polypeptide of interest or comprising the primary structure NH<sub>2</sub>-Px-X-Py-COOH, wherein Px is an N-terminal part of a polypeptide Pp of interest, Py is a C-terminal part of said polypeptide Pp, and X is a peptide addition comprising or contributing to a glycosylation site. The glycosylated polypeptides having improved properties as compared to the polypeptide of interest.
