Abstract (en)

[origin: FR2810759A1] The method employs a user smartcard (P) and a user terminal (T) with card reader which is in contact through a communication system (R) with a server (S) operated by a furnisher of digital goods. When an order is placed credit data (7) is sent to the server. On verification the digital goods (26) with use rights (225) are sent to the terminal. Communications are encrypted using public and private keys Independent claims are included for the electronic equipment used and the on line purchasing system
