Abstract (en)  
[origin: WO0205152A1] invention concerns a system and a method for managing micropayment transactions comprising at least a financial intermediary (1), at least a client (2), and at least a trader (3) in goods and/or services, said transactions being carried out with tokens. The invention is characterised in that each of said clients (2) is provided with at least two separate first token storage zones, corresponding to at least a main wallet and to at least a secondary wallet, said main wallet designed to contain tokens supplied by said financial intermediary (1) to said client (2), and said secondary wallet designed to contain tokens supplied by said at least one trader (3) to said client (2).
