Abstract (en)

[origin: EP1300243A2] Method for determining the position of a printed paper web (44) in a print machine, especially a rotary printing press, whereby: reference values for position determination are gained from a preliminary printing stage; at least a part of a print image on the paper web is measured using a sensor (43); the reference values are compared with the image data acquired with the sensor; and the position of the paper web is determined from the result of the comparison. <??>An Independent claim is made for a device for determining the position of a printed paper web in a rotary printing press using a CCD, CMOS or a linear camera and a contrast sampler.
