Abstract (en)
[origin: EP1300539A1] A shutter (DO) is fitted on to the end of the tunnel-shaped housing (CT) for a roller-blind or shutter. This includes an end plate (JO) includes a seating (LG) to receive a terminal (BO) providing an electrical for the electric motor within the housing. <??>The device comprises a shutter (DO) fitting on to the end of the tunnel-shaped housing (CT) for a roller-blind or shutter. The blind is intended to be driven by an electric motor (MOT). The shutter includes an end plate (JO) which lies parallel to the end. The end plate (JO) includes at least one seating (LG) which is intended to receive a terminal (BO) providing an electrical connection between the connection cables (CM) of the electric motor within the tunnel-shaped housing (CT), and the supply cables (CA) from an electrical supply (ALIM) external to the housing.
