Abstract (en)  
[origin: EP1300629A1] The current rail comprises supply lines (1) enclosed in elastic, strip-shaped insulating material (2). The system has at least one adaptor (4), containing contact elements, passing through the insulating material for conductive contacting of the supply lines. There is also a connecting section for one or more lamps (5). The system has also a flexible coating (3) surrounding the insulating material, at least partly.
