Abstract (en)
[origin: WO0203829A1] The invention relates to a system for transporting items of luggage, particularly a (so-called) wheeled case or trolley with detachable or interchangeable (suitcase) parts. Said system for transporting items of luggage comprises a roller device (10) and at least one item of luggage or a suitcase element (20), whereby a wheel arrangement (11) a traction device (12), and fastening attachments (13) are provided to detachably attach the items of luggage (20) to the roller device. The invention is characterised in that the fastening attachments (13) are connected to the roller device and can be detachably fixed inside the item of luggage. The fastening attachments can be, for example, made of strips of hook and loop fasteners, which are inserted through a slit (22) in a back panel (21) of the item of luggage (20) inside the item of luggage, whereby strips can be fixed.
