Abstract (en)
[origin: WO0207558A2] The invention relates to an improved skin care device comprising a container or carrier, granulated material, and active ingredients for skin care. Said container or carrier is filled, or can be filled, with the granulated material, and comprises a surface structure and/or walls (3) having openings (15), the openings (15) being designed or dimensioned in such a way that at least some of the particles in the granulated material inside the container or carrier partially jut out of said openings (15).
