Abstract (en)

[origin: WO0206086A1] The invention relates to a safety mirror for motor vehicles with a long vehicle front section, for the safe exiting from narrow exits, parking bays etc. The invention is characterised in that when not required, the mirror can drop or retract into the bonnet, the mirror can carry out a rotation, the mirror can tip, the mirror has a lightly convex form and that the mirror can be controlled by the driver, by means of a control device. [origin: WO0206086A1] The front mid-section of the vehicle bonnet is provided with an extending mirror for the safe exiting from narrow exits and parking bays etc. When not required the mirror may drop or retract into the bonnet.
