Abstract (en)
[origin: WO0204263A1] The invention relates to the fixture of a wiper board (36) in at least three fixing points (38, 40, 42) on a vehicle body (44) with elastic bearings (48). The first and second fixing points (38, 40) are located near to the wiper bearings (30, 32, 34) and the third fixing point (42) is located near to a wiper motor (10). Said third fixing point (42) can be adjusted in such a way that the wiper board (36) can be tilted about an imaginary axis through the first and second fixing points (38, 40). In the area of the third fixing point (42), opposite contact surfaces (58, 68) of the wiper board (36) and a fixing element (46) which is permanently fixed to the vehicle body (44) form an angle (delta). A rubber elastic element (48) is mounted between the contact surfaces (58, 68) with a screw (74), the front surfaces (56, 66) of said rubber elastic element corresponding to the contact surfaces (58, 68).
