Abstract (en)
[origin: WO0206864A1] The invention relates to a holographic display (3) for storing and reproducing a spatial structure. Said structure comprises a holographic screen (1) forming the master hologram, and a projection device (2) which lights up the holographic screen in order to reproduce the spatial structure. According to the invention, the holographic display consists of several holographic screens (1a, 1b), said screens being respectively associated with a specific projection device (2a, 2b).
