Abstract (en)
[origin: WO0188742A1] The present invention is directed to, in part, an efficient system and method for providing precise information to a user in response to a user input, as well as facilitating contact with merchants and other third parties. More specifically, a method is disclosed for providing data relating to a geographic location in a particular destination in response to a user input. The method comprises providing a map including the geographic location, receiving an identifier combination comprising a location identifier and a need identifier (609), accessing the data relating to the geographic location in a remote database based on the identifier combination (610), and transmitting the data to a user via a communication device. A method is also disclosed for providing data relating to one or more categories of information specific to a particular destination in response to a user input comprising providing a map including the particular destination, receiving an identifier combination comprising a need identifier and a sub-need identifier, accessing the data relating to the particular destination in a remote database, based on the identifier combination (646), and transmitting the data relating to the particular destination to a user via a communication device.
