Abstract (en)

[origin: EP1302326A2] A paper-transport device for large-format paper sheets includes control devices for the drive rollers (8) of the linkage part (7) for balancing out the discontinuously operating paper output of the plotter (1) and has selectively actuated paper retention elements (10,26) for forming at least one paper loop (9). <??>An Independent claim is given for a method of operating a paper transporting drive with a folding device.
