Abstract (en)
[origin: EP1302403A2] A tray for holding foodstuff or the like which tray is formed from paperboard or like foldable sheet material and can be erected from a flat collapsed condition into a position of use, the tray comprising a plurality of panels for forming a base, opposed side and end walls. The panels forming the tray are a composite structure comprising inner and outer panels forming the base, side and end walls. Part of the end portion along the inner side panel remains flat with the outer base panel and an engaging tab is formed along the part of the end portion to engage a slot in the inner side panel. <IMAGE>
