Abstract (en)

[origin: EP1302429A2] Electronic device for functional control and regulation of hydraulic and electric elevators, in which the positioning of the elevator cabin (8) is attained by positional control with the help of at least one positional sensor for determining the actual position of the elevator cabin, and the electronic device (1) has a microprocessor control which besides a microprocessor (42) has a memory and a supply entity (56) and input and output terminals for signals from the elevator from the elevator, the drive system, the safety devices and other sensors.
