Abstract (en)
[origin: EP1302574A2] A textile machine has a V-shaped spool rack discharging threads (15) to a warping machine (2). The spools (3, 3') are in vertical rows and horizontal lines, each with a thread guide (8). One shank (1, 1') of the rack has a row of bobbins each with an upright guide rods (9) linked by a horizontal arm (10, 10') forming a rigid frame. The frame is V-shaped as seen in plan view. The length of the rear section is between 10 and 50 per cent pref. 10 to 30 per cent of the rack overall length. The rack has a pneumatic or electric motor drive unit which rotates the rack about a vertical axle. The drive has a control unit which is synchronised with the warping machine.
