Abstract (en)
A cleaning device (1) cleans the measuring surface (29) of a contact concentration meter (30) for measuring the concentration of a size (4) on a slasher (2). The cleaning device (1) jets a cleaning fluid (34) through a cleaning nozzle (32) disposed opposite to the measuring surface (29) to remove a high-concentration size layer deposited on the measuring surface (29) or wipes the measuring surface (29) with a cleaning member (52) by linearly moving the cleaning member (52) along the measuring surface (29). <IMAGE>
