Abstract (en)  
A device for displacement ventilation (1;13;52) including a filter for filtering of supply air supplied to the device, is distinguished by a filter housing module (6;14;19) with at least one opening in its wall for placement of the filter (7;15;20) and thereby form a closed structure, wherein the filter housing module includes at least one connection (11,12) for a supply air conduit, and fastening means (3,4) for fastening the filter housing module to the device. The invention also concerns a filtering device for use therein. <IMAGE>
