Abstract (en)

[origin: EP1303065A2] A reception device for receiving digital data records has a storage device (10) for the received records and has a power supply device (14,16) for clocked streams of at least one part of the units of the reception device. An extraction/selection device (18) compares at least one information unit of the received records with at least one corresponding information unit of a stored or given data record. <??>A control device (18) outputs at least one control signal on the basis of the comparison signal for driving the power supply device (14,16). <??>An Independent claim is given for the following: <??>(1) an automobile radio or navigation device; and <??>(2) a method for actualizing the data records.
