Abstract (en)
[origin: WO0205778A1] The invention concerns a composition for oral or topical administration, comprising, in a physiologically acceptable medium, DHEA and/or a chemical or biological precursor or derivative thereof, combined with at least a NO-synthase inhibitor. Said composition can be used for cosmetic purposes, to prevent or treat skin irritation and/or sensitive skins and/or skin ageing symptoms. In another embodiment, it can be used for scalp and/or hair treatment, or again as slimming composition. The NO-synthase inhibitor can in particular be selected among: lipochroman-6, a grape, olive-tree or Ginkgo biloba extract or epicatechin.
