Abstract (en)

[origin: WO0210666A1] The invention relates to a weapon system comprising several rapid firearms of various construction types and associated add-on grenade launchers of the same type of construction, provided with an a handle (3) and, preferably, an individual sighting device (7). The inventive system displays the following characteristics: each rapid firearm has a force-receiving fixed bearing and a moveable bearing disposed at a distance therefrom for mounting the associated grenade launcher; the associated grenade launcher is provided with a force-inducing coupling device (13) which is fitted in such a way that it can engage with the force-receiving fixed bearing; an adapter (9, 9') is detachably mounted on the grenade launcher, said adapter respectively fitting the fixed and moveable bearings arranged on the rapid firearm at various distances therefrom and being provided with a non force-transmitting coupling device which is fitted in such a way that it engages with the moveable bearing.
