Abstract (en)

[origin: EP1304180A1] The feed unit (1), to insert plates into a stamping machine (2), has two advance push systems (7-10,12-15) over the material movement plane (20). The feeds transfer the plate workpiece between them so that, in the transfer position, only the grips (9,10) of the first system grip through the second feed system. A common support (6) carries and guides the movements of the two feed systems.
