Abstract (en)  
Flexible container for bulk products, consisting of a bag (1) made of an electrically conductive tissue, formed of non-conductive threads or non-conductive strips (3) on the one hand, and of conductive strips (4) made of a polyolefin comprising an electrically conductive material, incorporated in the tissue in the weft as well as in the warp on the other hand, whereby this bag (2) comprises a number of pieces (5,6,8) of tissue which are sewn together by means of thread, as well as fastening means fixed to the top part of the bag (1), characterised in that the conductive strips (4) made of a polyolefin comprising a conductive material are multi-layered strips. <IMAGE>
