Abstract (en)

[origin: EP1304420A1] The partitioning system, comprising a series of panels with vertical edges, has each edge made with two or more cut-outs for fasteners (5). Each fastener has a base (9) connected to the lower edge of one cut-out, and a pivoting plate (10) that engages with a cut-out in the facing edge of a neighbouring panel. The base and plate engage with the panel edge cut-outs by means of slots with a spacer between them forming a gap for inserting a disengagement tool.
