Abstract (en)  
[origin: EP1306033A2] The chair has one or more support element fixings (17) at the rear end of the seat cushion, for securing respective elastic support elements (18), each provided with a coil spring element (20) extending along its length and used for supporting a number of vertically spaced shaped elements (21) extending across the width of the seat backrest, which can be coupled together via vertical elastic stiffening elements (26). The lower shaped elements and/or the stiffening elements are coupled to one or more pivot levers (27), with a limited pivot movement, adjusted via a setting element (30).
