Abstract (en)
Only the members (7-9) of the rack that come into contact with the washload items are made in the form of a metal wire framework (1), whereas the remaining part of the rack is formed by a single complementary body (2) of plastics that comprises integrally a plurality of structural and/or functional members (3, 4, 5; 10, 11). The metal wire framework and the plastic body (2) are snap-fitted to each other. <IMAGE>
