Abstract (en)

The vehicle has a refuse collection container (2), a loading device (6) positioned at the rear of the collection container, a lifting device (8) for lifting and emptying of a refuse bin into the loading device and a support device (12) with at least one support foot (16), supporting the loading device from the ground when pivoted downwards from the outer contour of the vehicle. An independent claim for a method for controlling a refuse collection vehicle is also included.
