Abstract (en)
[origin: WO0122532A2] The invention relates to a method for producing an electrical connection between at least one connecting piece of a workpiece and at least one cable. First, the end of the at least one line is prepared. The prepared end of the at least one line is then positioned on the connecting piece of the workpiece. The at least one connection piece and the prepared end of the at least one cable are then welded together by means of laser radiation.
