Abstract (en)

[origin: EP1308406A2] Arrangement for detection of the position of side edges of a sheet on a printer support table when the leading edge of the sheet is aligned against front edge marks and the sheet edges lie within the allowable format range. The arrangement comprises two cameras arranged above format difference regions (17,18) on either side of the sheet in a rigid frame. <??>An Independent claim is made for a detection arrangement with a single camera (6), a single lens (10) and first and second sensor systems (11,12).
