Abstract (en)

[origin: EP1308529A1] A titanium aluminum intermetallic compound based alloy superior in creep strength and low cycle fatigue strength made by casting. The alloy has lamellar structure. A volume ratio of non-lamellar structure of the alloy is equal to or less than 3 volume percent. Diameters of lamellar grains included in the alloy are equal to or less than 200 μ m. Lamellar spacing of the lamella structure included in the alloy is equal to or less than 2 μ m. <IMAGE>
