Abstract (en)  
[origin: EP1308625A2] A system-control actuator controls the magnitude of the proportion of coolant fluid passing through a fluid cooler (14) based on parameter e.g. temperature of coolant fluid. An operation actuator controls the operation of system-control actuator in one direction to increase or decrease the proportion of coolant fluid passing through the fluid cooler. <??>An Independent claim is also included for a method for controlling the flow of coolant fluid through a compressor.
