Abstract (en)

[origin: WO0213969A1] The invention relates to containers (6) containing eight substances (602, 702), said containers being held in orifices (71) in a support (70). The eight containers (1) containing different substances, or identical substances in different quantities that are graduated according to their molecular equivalents, form a set (69) of substance containers that can be used for carrying out a chemical reaction.
