Abstract (en)

[origin: WO0216121A1] The invention relates to a method for positioning a male mould (34) on a counter-pressure cylinder (14) of an embossing station (10) interacting with an embossing cylinder (12), whereby the embossing cylinder (12) comprises a die (18). On the die (18) of the embossing cylinder (12) a flexible male transfer mould (24) is temporarily fixed comprising a registration window (32). The male transfer mould (24) is transferred from the embossing cylinder (12) to the counter-pressure cylinder (14) and fixed thereon. The mould (34) is finally adjusted and fixed in the registration window (32) of the transfer mould (24).
