Abstract (en)
[origin: WO0218620A2] The present invention relates to nucleic acid molecules encoding Neurokine-alpha and/or Neurokine-alphaSV polypeptides, including soluble forms of the extracellular domain. Neurokine-alpha and/or Neurokine-alphaSV polypeptides are also provided as are vectors, host cells and recombinant methods for producing the same. The invention further relates to antibodies or portions thereof that specifically bind Neurokine-alpha and/or Neurokine-alphaSV and diagnostic and therapeutic methods using these antibodies. Also provided are diagnostic methods for detecting immune system-related disorders and therapeutic methods for treating immune system-related disorders using the compositions of the invention.
