Abstract (en)  
[origin: WO0214762A1] The invention relates to a table-top refrigerator (10), the refrigerated chamber of which is equipped with trays (20, 27, 40) arranged one on top of the other in the form of a filter, which may be drawn out of the refrigerated chamber (16) by means of telescopic extensions (19). One of the trays (20) has an opening edge stepped such as to slope in the direction of displacement and a tray (27) arranged over the above has a stepped tray floor. The backward facing sections (25, 31) and the forward facing sections (26, 32) are thus essentially congruent in form.
