Abstract (en)
[origin: WO0214788A1] The invention relates to a method for the display of a route for a navigation system, whereby a route is determined between a current position of a vehicle and a target destination, a section of the route beginning with the current position is determined, the route section divided into individual partial stretches, each comprising a route detail, each partial stretch is assigned an image unit (1, 2, 3, 4, 5, 6, 11, 12, 13, 21, 22, 23, 31, 32, 33) corresponding to the route detail, selected from a given number of image units and said image units are arranged on a display field (7, 15) of an output unit in such a way that consecutive partial stretches of the route section are displayed in adjacent image units (1, 2).
