Abstract (en)

[origin: WO0215147A1] The invention relates to a system for reproducing information regarding an object and provided in a plurality of information sources (210a, 210b, 210c) to a user or to a reproduction device depending on the location of the user or the reproduction device. Said system comprises a device (200) for determining the location, a device (206) for selecting the information to be reproduced depending on a defined location and on one or more pre-adjustable selection criteria that define an information source from the plurality of information sources, and a device (208) for outputting the information to be reproduced.
