Abstract (en)
[origin: WO0215343A1] The invention relates to a connector system with a discriminating latching feature. The connector system comprises two connectors (30, 40), the first connector (40) having female contacts and the second connector (30) having male contacts. The connectors are furthermore provided with latching elements (20) that interlink the connectors (30, 40). The inventive connector system is further characterized in that in at least one of the connectors (30, 40) the latching elements (20) can be detached from the connector (30, 40).
