Abstract (en)

A sleeve forming blank 10 for packaging an endless belt comprises a sheet having five parallel fold lines 11,12,13,14,15 defining six separate wall forming sections. The first 21, second 22 and third 23 sections are foldable to define a tubular part enclosing a first side of an endless belt, a tab 28 provided on the first end of the elongate blank 10 being insertable into a first slot 29 provided in the blank 10, to fasten the blank 10 to the endless belt while allowing a plurality of similar belts to be nested inside on another. Once the endless belt 31 is ready to be displayed prior to sale, the fifth 25 and sixth 26 sections of the blank 10 can be folded around the opposite side of the belt, and a tab 32 can be inserted into a slot 33 in the tubular part such that the folded blank 10 defines an open ended sleeve wrapped around the sides of the endless belt 31 to constrain the belt 31 into an elongate display configuration. <IMAGE> <IMAGE>
