Abstract (en)

[origin: EP1310450A1] The cable reel is made up of modular units (100,200) assembled end-to-end (300). Each unit has a disk and a central hub, and the hubs can engage one with the other. Each disk is made up of a number of radial segments (116,126) with angular space between them, allowing the cable to pass from one modular unit to the next.
