Abstract (en)
[origin: EP1310741A2] Extraction hood comprises a housing (12) and one or more filters for cleaning the airflow. The filters are arranged on at least one plate (14) which pivots against the housing on the flow side of the extraction hood. <??>Preferred Features: The plate is a perforated sheet having several partial regions provided with holes. The plate has recesses (16) receiving illuminating devices. The filters designed as filter inserts are held between parallel profiles (50) on the upper side of the plate. The filters are designed as grease filter inserts (30) which are joined to odor filter inserts.
