Abstract (en)

[origin: EP1310837A1] Device comprises a non-climatized, feed-back free section for management of the air quality in a first inner section (150) and a climatized feed-back section (120) for management of air quality in a second inner region (130). The first inner section comprises a fixing station, while the second inner section comprises a number of sequential image generation modules with additional chambers through which climatized air is supplied. The two sections are separated by a separation element and the climate-control device serves to control air temperature and humidity.
