Abstract (en)
[origin: EP1310972A1] A fuse box (10) for vehicles comprises a bottom (14) which houses at least one fuse (34-40) connected electrically to one pole of a battery by means of a distribution plate (52), and a battery clamp (48) connected electrically to the said distribution plate (52) and capable of being fitted directly on to the pole of the battery and of supporting the fuse box (10). The distribution plate (52) comprises an element (54) which extends away from the said distribution plate (52) and forms a connection element for gripping means (56), the said element being capable of forming a mechanical connection and an electrical connection between the vehicle battery and a lead (58) for emergency starting. <IMAGE>
