Abstract (en)

[origin: WO0216912A1] The invention concerns a device for supporting chromophoric elements comprising support means (1) for receiving on a top surface (24) chromophoric elements (5) adapted to emit light in selected conditions, and means for concentrating light (3) to recuperate the light emitted by each chromophoric element (5) in part of the zone which surrounds it and to deliver said recuperated light to a collecting device.
