Abstract (en)
[origin: EP1312565A1] Transportation frame for motorcycles or other two wheelers having a front wheel and a rear wheel comprises a base (1), at least two side walls (2,3) where the front side wall folds outward for loading the two wheeler, and at least one base trough for holding the front wheel and the rear wheel. The base trough is a continuous loading channel (6) arranged between lateral foot plates (7) and having a protrusion (8). <?? >Preferred Features: The loading channel is a U-shaped profile rail connected at the top of its arms (6a,6b) to the foot plates. The loading channel has different depths to produce the protrusion.
