Abstract (en)
[origin: EP1312573A1] In an elevator apparatus, a car and a counterweight are suspended in a hoistway in a 1:1 roping method. A driving machine is disposed so that the axis of the driving sheave extends in a vertical direction. A first turning deflector sheave for guiding the main rope from the driving machine to the car and a second turning deflector sheave for guiding the main rope from the driving machine to the counterweight are disposed at an upper portion of the hoistway. <IMAGE>
