Abstract (en)
[origin: WO0217764A1] Toilet block for at least one composting toilet of the type which comprises a toilet bowl (16) and, situated below this, a holder (10) for receiving night-soil (23) delivered via the toilet bowl and for removing completely or partially broken down night-soil. the toilet block is prefabricated and designed in two parts in the form of an upper part (1), which is intended to accommodate at least one toilet bowl (16) and possibly wash-basins and showers, and a lower part (2) which is intended to accommodate a holder (19) for receiving and composting night-soil (23) delivered via a toilet bowl (16) in the upper part (1), and possibly a water heater and a water pump. The upper part (1) and the lower part (2) are dimensioned in such a way that the two parts can be situated one inside the other in a position for transport and storage. When the toilet block is being installed at the intended place of use, the upper part (1) can be lifted and secured relative to the lower part in a raised position in which the ceiling (6) of the lower part in a raised position in which the ceiling (6) of the lower part becomes the floor of the upper part.
